

PRAFULDAS M M

📍 Thrissur, Kerala, India ✉ d.praful@outlook.com ☎ +91 8137823639 📁 Portfolio in prafuldasm
 📱 dpraful

Professional Summary

AI Systems & Full Stack Developer specializing in computer vision, real-time AI applications, and scalable cross-platform systems. Experienced in building production-grade mobile, desktop, and backend solutions with expertise in face recognition, spoof detection, performance optimization, and secure AI integration.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL
AI & ML: TensorFlow Lite, InsightFace, Google Colab
Frontend: React Native, React.js, Electron.js, Tauri
Backend: FastAPI, Django
Database: Microsoft SQL Server, LRU Caching
Tools: Docker, Git, Postman, Android Studio, Jaspersoft Studio, Google AdMob

Experience

- | | | |
|---|--|---------------------------|
| Software Developer
Thrissur, Kerala | Jescon Technologies PlayStore 🔗 | <i>Oct 2024 – Present</i> |
|---|--|---------------------------|
- Designed and implemented high-performance **AI systems**, including:
 - **Face Authentication System** [🔗](#) using InsightFace + FAISS (10K+ encodings) achieving 500ms latency
 - **Spoof Detection Engine** using TensorFlow Lite (C++ + JSI) **60 FPS real-time processing**
 - **AI API Integration** in EMR for assisting doctors with symptom-based prescription search, medical information retrieval, and drug interaction checking for potential medication conflicts.
 - Designed and implemented backend systems: including:
 - **ABDM Creation** [🔗](#) **HIP/HIU workflows** for patient record linking and health data discovery
 - **ABDM Gateway integration** with token management and async callback handling
 - Built scalable enterprise solutions across healthcare and operations: including:
 - **Dynamic Reporting System** using Jaspersoft for reusable, audit-ready report generation
 - **Google Play Console** Internal, closed, open testing, production deployment, and maintenance
 - **Hospital Insurance System** [🔗](#) with real-time tracking and validation workflows
 - Architected a **multi-stage insurance pipeline** (Allocation → Verification → Billing → Payment) reducing claim settlement time by 40%, with real-time status tracking across all stages
 - Implemented **patient information management** with structured validation for admission, ward/bed occupancy, and insurance coverage
 - **Inventory Management System** [🔗](#) with full lifecycle tracking and live stock
 - Developed **full stock lifecycle management** (Entry → Transfers → Issues → Adjustments) with real-time balance updates across 50+ locations, and engineered an **intelligent reorder system**
 - Designed **multi-stage verification workflows** (Quantity/Quality/Rate → Accounts → Admin) ensuring 100% purchase accuracy, with integrated label/card printer support
 - Created **live dashboards** and **50+ dynamic reports** (Stock Register, Purchase Summary, Tax Reports, Sales Collection) providing actionable business intelligence and decision-making insights
 - Developed reusable and cross-platform solutions: including:
 - Configurable **Advanced Search module** adaptable across multiple APIs
 - Secure **Electron desktop applications** [🔗](#) with IPC communication and document preview

AppForms Developer (Intern)

ClaySys Technologies

July 2024 – Aug 2024

Kochi, Kerala

- Developed data-driven business applications using **AppForms** integrated with **Microsoft SQL Server**.
- Designed and optimized **Stored Procedures** for data retrieval, validation logic, and transactional workflows.

Python Full Stack Developer (Intern)

Techolas Technologies

July 2023 – April 2024

Kochi, Kerala

- Developed RESTful APIs using Django and FastAPI integrated with MS SQL Server for web applications.
- Built responsive front-end interfaces using React.js and managed database operations ensuring seamless synchronization.
- Developed full-stack **E-Commerce Store** [🔗](#) with user authentication (JWT), product catalog, and order tracking.
- Created dual-interface **Platform For Job Seekers** [🔗](#) (resume upload, applications) and admins (job postings).

Open Source Contributions

react-native-electron-platform

[View Npm Package 🔗](#)

2025 – Present

- Enabled building **React Native** applications for **macOS, Windows, Linux, and Web** with **maximum Node.js module compatibility** and seamless desktop integration.

react-native-vision-camera-spoof-detector

[View Npm Package 🔗](#)

2025 – Present

- Built a **TensorFlow Lite + C++ JSI** powered face anti-spoof detection engine for Vision Camera with real-time **60 FPS inference**, leveraging **bridgeless new architecture** with **GPU acceleration**.

react-native-installer

[View Npm Package 🔗](#)

2025 – Present

- Built an Android native module enabling secure **in-app APK installation** with FileProvider, permission handling, and programmatic install flows.

insightface-recognition-sdk

[View PyPI Package 🔗](#)

2026 – Present

- using InsightFace for secure employee authentication and **Attendance Management** in an HIS (HR) system, with face encoding, storage, retrieval, and real-time face matching.

Personal Projects

KeepQuite (closed testing)

React Native, FastAPI, MYSQL

[KeepQuite 🔗](#)

- Developed a horror mobile game that uses phone sensors to create immersive gameplay interactions.
- Integrated gyroscope and motion sensor controls to trigger in-game events and player actions.

Education

Master of Computer Applications (MCA)

IGNO University

July 2024 – July 2026

Bachelor of Computer Applications (BCA)

University of Kerala

July 2020 – July 2023

Certifications & Achievements

- NACTET Certified Python Full-Stack Developer
- NSDC Certified Automotive Service Technician Diploma
- Postman API Fundamentals Student Expert
- Infosys Springboard Certified React Native Developer
- Infosys Springboard Certified Jasper Report Developer
