

PRAFULDAS M M

📍 Thrissur, Kerala, India ✉ d.praful@outlook.com ☎ +91 8137823639 📁 Portfolio in prafuldasm 🌐 dpraful

Professional Summary

AI Systems & Full Stack Developer specializing in computer vision, real-time AI applications, and scalable cross-platform systems. Experienced in building production-grade mobile, desktop, and backend solutions with expertise in face recognition, spoof detection, performance optimization, and secure AI integration.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL
AI & ML: TensorFlow Lite, InsightFace, Google Colab
Frontend: React Native, React.js, Electron.js, Tauri
Backend: FastAPI, Django
Database: Microsoft SQL Server, LRU Caching
Tools: Docker, Git, Postman, Android Studio, Jaspersoft Studio, Google AdMob

Experience

Software Developer **Jescon Technologies** [PlayStore](#) *May 2024 – Present*
Thrissur, Kerala

- Designed and implemented high-performance **AI systems**, including:
 - **Face Authentication System** using InsightFace + FAISS (10K+ encodings) achieving 500ms latency
 - **Spoof Detection Engine** using TensorFlow Lite (C++ + JSI) **60 FPS real-time processing**
 - **AI API Integration** in EMR for assisting doctors with symptom-based prescription search, medical information retrieval, and drug interaction checking for potential medication conflicts.
- Designed and implemented backend systems: including:
 - End-to-end **ABDM integration** (ABHA creation, authentication, consent-based data exchange)
 - **HIP/HIU workflows** for patient record linking and health data discovery
 - **ABDM Gateway integration** with token management and async callback handling
- Built scalable enterprise solutions across healthcare and operations: including:
 - **Dynamic Reporting System** using Jaspersoft for reusable, audit-ready report generation
 - **Google Play Console** Internal, closed, open testing, production deployment, and maintenance
- **Hospital Insurance System** with real-time tracking and validation workflows
 - Developed a **Insurance System** with real-time insurance status tracking and validation workflows.
 - Implemented **patient information management** with structured data handling and validation to streamline insurance processing.
- **Inventory Management System** with full lifecycle tracking and live stock
 - supporting stock entry, consumption, adjustments, and real-time inventory balance tracking.
 - **Dashboards** providing live stock visibility and actionable insights for business decision-making.
- Developed reusable and cross-platform solutions: including:
 - Configurable **Advanced Search module** adaptable across multiple APIs
 - Secure **Electron desktop applications** with IPC communication and document preview

AppForms Developer (Intern) **ClaySys Technologies** *July 2024 – Aug 2024*
Kochi, Kerala

- Developed data-driven business applications using **AppForms** integrated with **Microsoft SQL Server**.

- Designed and optimized **Stored Procedures** for data retrieval, validation logic, and transactional workflows.

Python Full Stack Developer (Intern)
Kochi, Kerala

Techolas Technologies

July 2023 – April 2024

- Developed RESTful APIs using Django and FastAPI integrated with MS SQL Server for web applications.
- Built responsive front-end interfaces using React.js and managed database operations ensuring seamless synchronization.
- Developed full-stack [E-Commerce Store](#) with user authentication (JWT), product catalog, and order tracking.
- Created dual-interface [Platform For Job Seekers](#) (resume upload, applications) and admins (job postings).

Open Source Contributions

react-native-electron-platform	View Npm Package	<i>2025 – Present</i>
◦ Enabled building React Native applications for macOS, Windows, Linux, and Web with maximum Node.js module compatibility and seamless desktop integration.		
react-native-vision-camera-spoof-detector	View Npm Package	<i>2025 – Present</i>
◦ Built a TensorFlow Lite + C++ JSI powered face anti-spoof detection engine for Vision Camera with real-time 60 FPS inference , leveraging bridgeless new architecture with GPU acceleration .		
react-native-installer	View Npm Package	<i>2025 – Present</i>
◦ Built an Android native module enabling secure in-app APK installation with FileProvider, permission handling, and programmatic install flows.		
insightface-recognition-sdk	View PyPI Package	<i>2026 – Present</i>
◦ using InsightFace for secure employee authentication and Attendance Management in an HIS (HR) system, with face encoding, storage, retrieval, and real-time face matching.		

Personal Projects

KeepQuite (closed testing)	<i>React Native, FastAPI, MYSQL</i>	KeepQuite
◦ Developed a horror mobile game that uses phone sensors to create immersive gameplay interactions.		
◦ Integrated gyroscope and motion sensor controls to trigger in-game events and player actions.		
Pixa (closed testing)	<i>React Native, FastAPI, MYSQL</i>	Pixa
◦ Developed a sports social media and turf booking platform with real-time interaction features.		
◦ Implemented user profiles, post sharing, chat system, and online turf reservation management.		

Education

Master of Computer Applications (MCA)	IGNOU University	<i>July 2024 – July 2026</i>
Bachelor of Computer Applications (BCA)	University of Kerala	<i>July 2020 – July 2023</i>

Certifications & Achievements

- NACTET Certified Python Full-Stack Developer
- NSDC Certified Automotive Service Technician Diploma
- Postman API Fundamentals Student Expert
- Infosys Springboard Certified React Native Developer
- Infosys Springboard Certified Jasper Report Developer
